High Performance Bike Components

CHAINRING CR-DX005-110

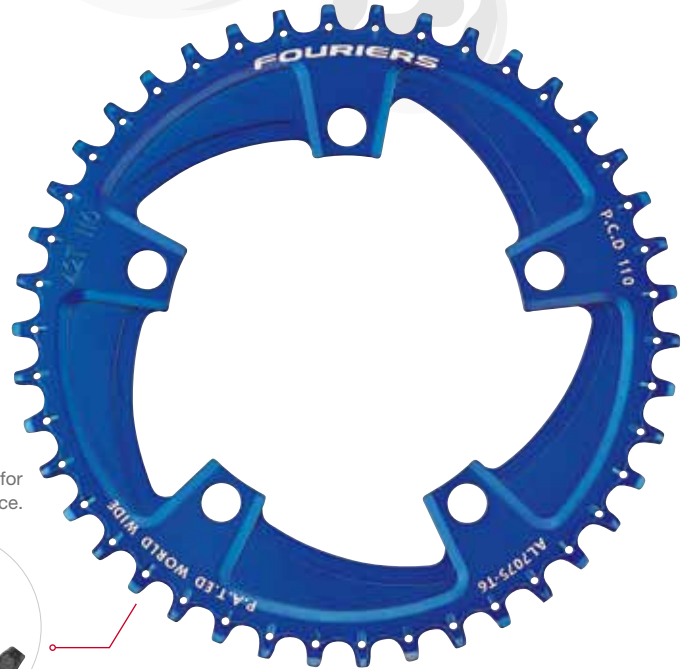

Full CNC made narrow-wide front chainring for Cyclocross 1x system. Narrow-wide teeth together with Fouriers' snug fit wave design have extreme chain retention qualities. Additionally each tooth has CNC cut holes for mud clearance. For PCD/BCD 110mm x 5 arms standard.

Product Features:

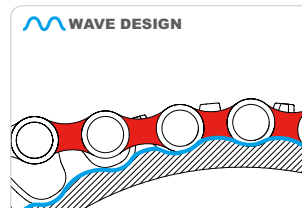

Material :	Alloy 7075-T651: CNC made
P.C.D :	Ø110 mm
Teeth :	38T, 40T, 42T
Weight :	81g (38T)
Color :	S.B. Anodized Black, Red, Blue

P.A.T Wave design profile
Teardrop mud clearance technology

Teardrop holes
Teardrop cut holes for better mud clearance.

Narrow wide teeth
Alternating thick and thin shapes to tightly fit chainring.

Wave Technology
Wave shape profile on the ring side for snug fit.

CHAINRING CR-DX006-130

Full CNC made narrow-wide chainring for Cyclocross 1x system. Narrow-wide teeth together with Fouriers' snug fit wave design have extreme chain retention qualities. Additionally each tooth has CNC cut holes for mud clearance. For PCD/BCD 130mm x 5 arms standard.

Product Features:

Material :	Alloy 7075-T651: CNC made
P.C.D :	Ø130mm
Teeth :	38T, 40T, 42T
Weight :	81g (38T)
Color :	S.B. Anodized Black, Red, Blue

P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING

CR-DX007-OV

Oval shape design make the spin cycle a lot smoother and easier on the legs while climbing. Adjust the oval ring in 3 position to increase it's effect.

N/W tooth design with our snug wave design have extreme chain retention qualities, CNC cut holes for mud clearance.

Product Features:

Material :	AL7075-T651
P.C.D :	Ø104mm
Teeth :	34T, 36T
Weight :	79g (34T)
Color :	S.B Anodized Black, Red, Blue

P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING

CR-GXP01

One piece full CNC machined GXP chainring, Narrow wide teeth with our snug fit wave design and CNC cut holes for mud clearance. Compatible with SRAM® XX1/ X0/ X9 and GXP cranks.

Product Features:

Material :	AL7075-T651
Teeth:	30t, 32t, 34t, 36t, 38t
Weight :	105g (34T)
Color :	S.B black, red, blue

P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING CR-DX008-SKII

The evolution of 40/40T rear sprocket. A two piece design made for a stable and durable drivetrain. The teeth is made from very strong Cr-mo heat treated steel and body from AL6066 for its stiff- and lightness.

Challenge steep climbs and modify your SHIMANO cassette with the Mage SK2 40/42T sprocket. Recommended for 1x and 2x drivetrain systems. Comes with longer B-tension screw and redesigned 16T sprocket (CR-S005-16) for smoother shifting and tooth ratio. For installation take out the 15T & 17T sprocket and install the 16T between the 13T and 19T. Add the 40/42T after the largest sprocket.

Product Features:

Material :	Sprocket Cr-mo ASM4130 heat treated (a) AL6066-T6: CNC made body (b) CR-S005-16(16T): forged Cr-mo ASM4130 heat treated
Spec :	40T or 42T
Weight :	40T: 110g / 42T: 115g
Color :	(a) S.B Anonized Black, Red, Gold, Blue, Apple Green, Orange (b) CR-S005-16 (16T): N.E.N finish

For 10-speed (Shimano® Deore XT / XTR)
For the best 1x10 setup, we recommend our CR-DX003-AH chainring.

CHAINRING CR-DX010-96

Full CNC made narrow wide chainring for 1x system. Narrow wide teeth together with our snug fit wave design have extreme chain retention qualities. Additionally each tooth has CNC cut teardrop holes for mud clearance. Special made for P.C.D 96mm x 4 arms standard.

Product Features:

Material :	AL7075-T651: CNC made
P.C.D :	Ø96mm
Teeth :	32T, 34T, 36T, 38T
Weight :	52g (34T)
Color :	Anodized Black, Red, Blue

P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING CR-DX9000

Narrow Wide chainrings for XTR M9000/M9020 11 speed crank with custom made crank cover caps. The narrow-wide profile with our snug fit wave design have extreme chain retention qualities. Each tooth has additional CNC cut teardrop holes for better mud clearance.

Product Features:

Material :	AL-7075-T651
Spec :	30t, 32t, 34t, 36t
Weight :	46g (34T)
Color :	S.B black, red, blue

For SHIMANOR® XTR M9000/M9020
Comes with customized crank cover caps.
P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING CR-DX9000-OV

Narrow Wide Oval chainrings for XTR M9000/M9020 11 speed crank with custom made crank cover caps. Oval shape design make the spincycle a lot smoother and is easier on legs while climbing. Adjust the oval in 3 position to increase its effect. The narrow-wide profile with our snug fit wave design have extreme chain retention qualities. Each tooth has additional CNC cut teardrop holes for better mud clearance.

Product Features:

Material :	AL-7075-T651
Spec :	34t, 36t
Weight :	83g (34T)
Color :	S.B black, red, blue

For SHIMANOR® XTR M9000/M9020
Comes with customized crank cover caps.
P.A.T Wave design profile
Teardrop mud clearance technology

CHAINRING

CR-DX009-CM

The evolution of narrow-wide single front chainrings. Made by Cr-mo heat treated steel for long lasting durability with pin point CNC finish. This ring can bear a life-time of riding and will never drop with its narrow-wide tooth and Fouriers' snug fit wave design. Additionally each tooth has CNC cut teardrop holes for mud clearance.

Product Features:

Material :	Cr-mo heat treated steel
P.C.D :	Ø104mm
Teeth :	32T, 34T, 36T, 38T
Weight :	125g (34T)
Color :	N.E.N, Ti-coating

P.A.T Wave design profile
Teardrop mud clearance technology
Compatible with SHIMANO®

CHAIN GUIDE

CT-DX011

Designed for MTB 1x system drive train. Special design for 28t~32t chainrings to avoid chain drops during heavy use. Simple but effective!

Product Features:

Material :	ALOY 6061T6 CNC made
Spec :	ISCG / ISCG 05
Size :	28t~32t
Thickness :	5mm
Weight :	52g
Color :	Anodized Black, Red, Blue

CRANK

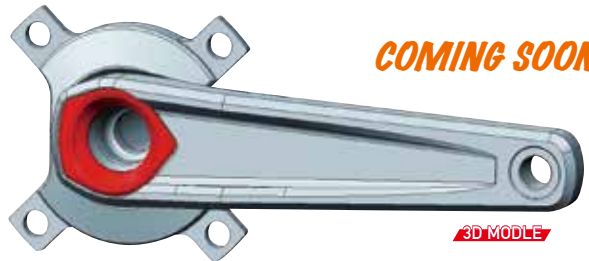

CK-GXP11

G.Impact 11 speed GXP Crankset. The G.Impact is entirely made of AL7075 aluminum material, resulting in an ultra lightweight crank arm with superior strength. Developed for maximum chain control, each tooth's thickness is precisely CNC-machined. The 30mm Hollow axle allows greater bearing durability and stronger crank construction. While the circle spider can convey more efficient power and withstand great impact.

Product Features:

Material :	AL7075-T651
Length :	175mm, 180mm
Bottom :	BB30, Pressfit
Color :	Black, Gray

COMING SOON

3D MODEL

BB30 External Bearing system.

Fix SRAM® GXP spider & GXP chainring.

CRANK

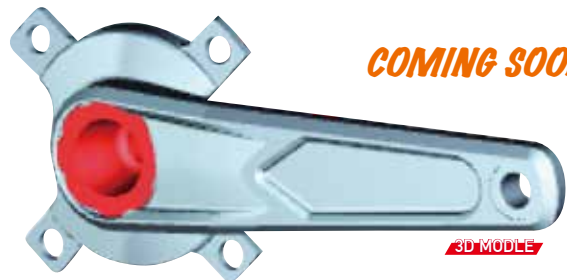

CK-BTR11

Buster 11 speed Crankset. Latest technology and riding experience for Mountain Bike. Developed for maximum chain control, each tooth's thickness is precisely CNC-machined. The 30mm Hollow axle allows greater bearing durability and stronger crank construction. While the circle spider can convey more efficient power and withstand great impact.

Product Features:

Material :	AL7075-T651
Length :	175mm, 180mm
Bottom :	BB30, Pressfit 30
Color :	Black, Gray

COMING SOON

3D MODEL

BB30 External Bearing system.

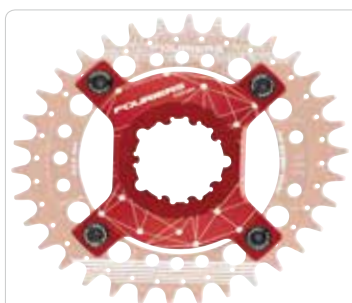

ADAPTER

ADP-GXP104

Full CNC made spider adapter for P.C.D Ø104 chainring compatible with SRAM® XX1/ X0/ X9 and GXP cranks.

Product Features:

Material :	AL 7075-T651
Weight :	55.5g
Color :	S.B black, red, blue

HANDLEBAR
HB-MB016-CC

Triple butted eccentric handlebar with Fouriers Control Curve Technology (CC) for absolute control and ergonomic comfort. The control curve bend at the hand grip area functions as an arch support for the hands. Riders benefit from less hand fatigue and great comfort in all riding positions, creating confident control. Flip over to adjust by +/- 5mm.

Product Features:

Material :	AL7050-T73
Spec :	Ø31.8mm x W680, 760mm
Back Sweep :	9°
Eccentric :	5mm
Weight :	215g (W680mm)
Color :	S.B Anodized Black

W/ Control curve bend

HANDLEBAR
HB-MB017-M

Aluminum utilitarian trekking handlebar with Fouriers Control Curve Technology (CC) for absolute control and ergonomic comfort. Featuring a comfortable sweep for enduring rides, while giving additional leverage and more control. The control curve bend at the hand grip area functions as an arch support for the hands. Riders benefit from less hand fatigue and great comfort in all riding positions. Best suited for long-distance off road riding.

Product Features:

Material :	AL7050-T73
Spec :	Ø31.8mm x W720mm
Back Sweep :	58 degrees
Rise :	20mm
Weight :	380g
Color :	S.B Anodized Black

W/ Control curve bend

HANDLEBAR
HB-MB0101-H

Double butted aluminum flat handlebar made from aluminum 7050 to reduce weight and maintain strength. This handlebar is made to endure anything and can load up to 800kgs pressure. Available in many striking anodized colors.

Product Features:

Material :	AL7050-T73
Spec :	Ø31.8mm x W720mm
Back Sweep :	5°
Overload :	800kgs
Weight :	275g
Color :	S.B Anodized Red, Gold, Gray, Blue, Apple Green, Orange, Purple, Ocean Blue

WATER BOTTLE
WBC-BE001

The Fouriers® GOLF DIMPLE Bottle incorporates Jet Valve, a revolutionary self-sealing valve, into a spill- and splatter free bottle. The dimple surface has extra aerodynamic qualities and adds grip to the bottle for easy and quick consumption.

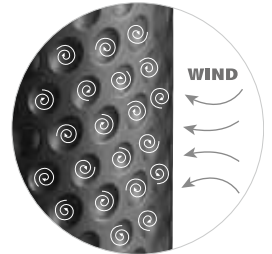

The lightweight bottle is made of TruTaste™ LDPE with HydroGuard™ and lets you taste your water, not your bottle. Open/close the valve for safe travel and wide-mouth opening for easy cleaning.

Product Features:

- Material : LDPE
- Volume : 600cc
- Weight : 60g
- Color : Black, Red, White, Transparent

PRESSURE VALVE CAP
 Special valve design allows clean and easy drinking. Open the cap and slightly squeeze the bottle for drinking. No squeezing = no water outflow, even with an open cap.

AERO-DYNAMIC DIMPLE SURFACE
 Similar to golfballs, the dimple surface adds additional air penetration for greater aero-dynamics.

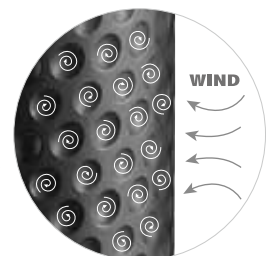

WATER BOTTLE
WBC-BE002-E

The Fouriers® GOLF DIMPLE Bottle. The dimple surface has extra aerodynamic qualities and adds grip to the bottle for easy and quick consumption.

The lightweight bottle is made of TruTaste™ LDPE with HydroGuard™ and lets you taste your water, not your bottle.

Product Features:

- Material : LDPE
- Volume : 600cc
- Weight : 60g
- Color : Black, Red, White, Transparent

AERO-DYNAMIC DIMPLE SURFACE
 Similar to golfballs, the dimple surface adds additional air penetration for greater aero-dynamics.

STEM SM-RA009

Advanced lightweight full CNC made stem. Cut out of one aluminum 6066 block to improve overall strength and anti-corrosion. Stem has ± 17 degree angle. Flip over to change stem angle to ± 17 degrees. Available in 7 sizes between 80-140mm. For Road.

Product Features:

Material :	AL6066-T6 full CNC made
Handlebar Clamp :	$\varnothing 31.8\text{mm}$
Fork Tube :	$\varnothing 31.8\text{mm}$
Fork Stack Height :	40mm
Angle :	$\pm 17^\circ$
Length :	80 - 140mm
Weight :	155g (140mm)
Color :	Anodized Black

With Top Cap (TC-DX002) & Carbon shim for $\varnothing 28.6$ (AC-S001)

STEM SM-MB007

The most popular short stem redesigned. Entirely made from CNC with smoother edges and improved handle. Special made for $\varnothing 31.8\text{mm}$ handlebars.

Product Features:

Material :	AL6066-T6: CNC made
Handlebar Clamp :	$\varnothing 31.8\text{mm}$
Fork Tube :	$\varnothing 28.6\text{mm}$
Fork Stack Height :	40mm
Angle :	0°
Length :	45mm
Weight :	144 g (without TOP CAP)

HEAD ACCESSORIES HA-S018-D12

SHIMANO® Di2 Junction adapter made by CNC. Securely install your Di2 Junction underneath your stem without any zip-ties. A simple spacer installation for a cleaner and professional look. Choose out of 2 different angles.

Product Features:

Material :	AL6061-T6: CNC made
	$\varnothing 28.6$ Fork
Angle :	6° & 17°
C-C Length :	42/45/50/55/60
Weight :	6.5g
Color :	black, red, gray

Compatible with SHIMANO® Di2 Junction

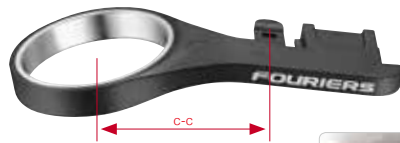

HEAD ACCESSORIES HA-S016

SHIMANO® Di2 Junction adapter. Securely install your Di2 Junction underneath your stem without any zip-ties. A simple spacer installation for a cleaner and professional look. Choose out of 2 different angles.

Product Features:

Material :	Nylon body, AL6061-T6 spacer
For :	$\varnothing 28.6$ fork
Angle :	6° & 17°
C-C Length :	32/44
Weight :	7g/pcs
Color :	black

Compatible with SHIMANO® Di2 Junction

BRAKE SYSTEM

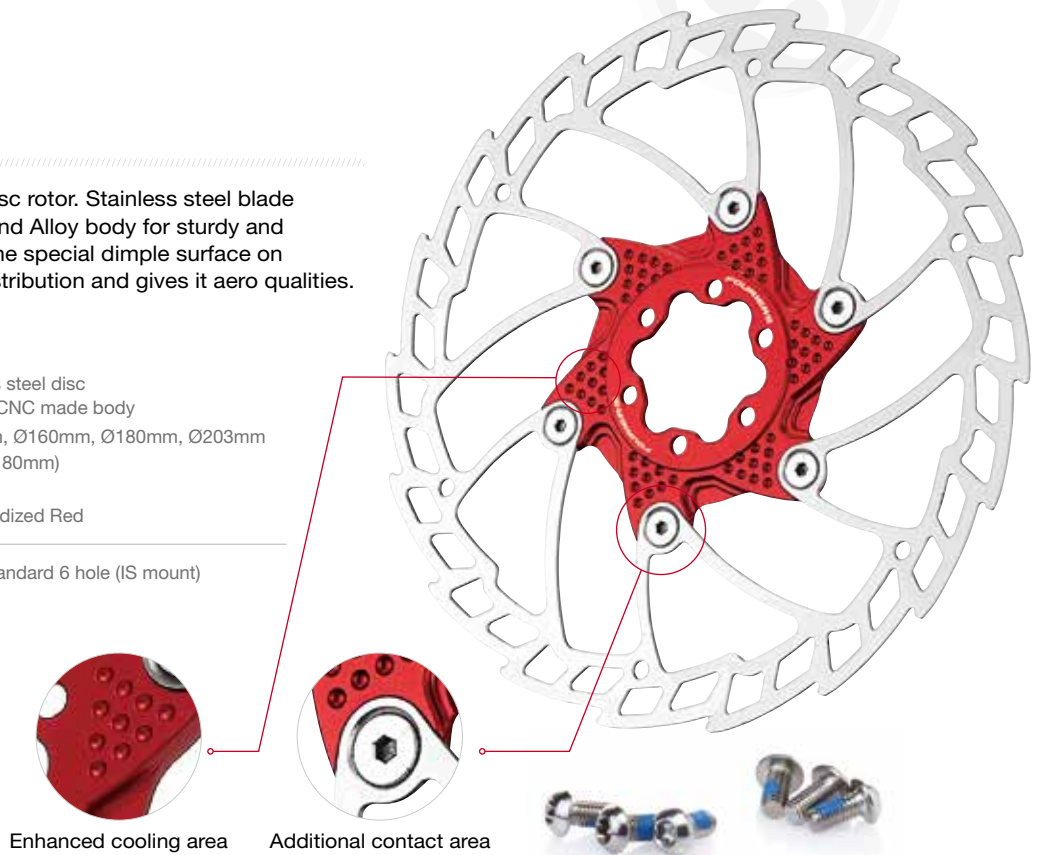

BR-DSK001

Unique two piece design disc rotor. Stainless steel blade for reliable braking power and Alloy body for sturdy and lightweight performance. The special dimple surface on the body optimizes heat distribution and gives it aero qualities.

Product Features:

Material :	Stainless steel disc AL6061 CNC made body
Od Size :	Ø140mm, Ø160mm, Ø180mm, Ø203mm
Weight :	136g (Ø180mm)
Thickness :	1.7mm
Color :	S.B. Anodized Red

Compatible with international standard 6 hole (IS mount)

Enhanced cooling area

Additional contact area

ADAPTER

ADP-PM001

Adaptor to mount larger disc brake rotor. Fits 74mm post mount caliper and post mount fork.

Product Features:

Material :	AL6061-T6: CNC made
Post Mount:	74mm
Spec :	140mm to 160mm 160mm to 180mm
Weight :	11g/pcs
Color :	S.B. Anodized Black, red, gray

Post mount to post mount

ADAPTER

ADP-PM002

Adaptor to mount larger disc brake rotor. Fits 74mm post mount caliper and post mount fork.

Product Features:

Material :	AL6061-T6: CNC made
Post Mount:	74mm
Spec :	160mm to 203mm
Weight :	23g/pcs
Color :	S.B. Anodized Black, red, gray

Post mount to post mount

MUDGUARD AC-MG003-F

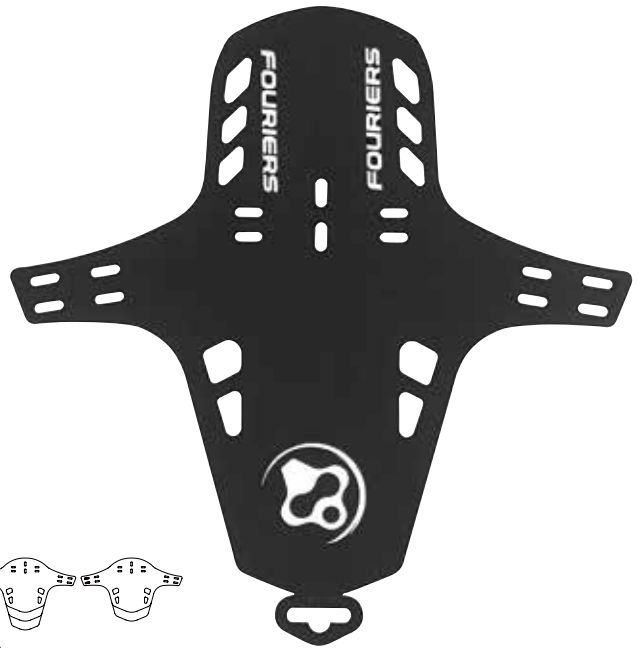

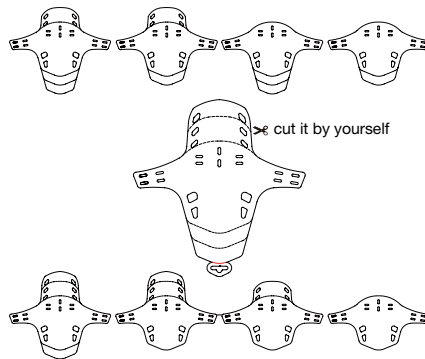

Front fork mudguard can efficiently prevent mud splashes. This smart design has special cut lines on the belly side for customization.

We use eco-friendly and recyclable PP (polypropylene) material. Choose out of six striking colors.

Product Features:

Material :	Polypropylene (PP)
Thickness :	0.8mm
Weight :	28g
Color :	Black, Apple Green, Orange, Pink, White, Yellow

Assemble on MTB suspension fork

SPACER SR-E003

Classic aluminum spacer with high polished anodized center piece in different colors.

Product Features:

Diameter :	ID: Ø28.6mm / OD: Ø34mm
Material :	AL6061-T6: CNC Made
Weight :	12g/set
Heigh :	5mm
Color :	Black, Silver, Red, Gold, Gray

Set of 4 spacers

TOOL
TL-ST001

This is a Brand New 9-Piece Metric Ball End Hex key L-Wrench Set. Eye-catching colors and simple design. Special heat treated process and Japanese steel for prolonged tool life. Soon to be your favorite tool.

Product Features:

- Material :** Heat treatment steel 6150 tool / Nylon body
- Allen Wrench :** 1.5mm, 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm, 8mm, 10mm
- Weight :** 385g/set
- Color :** CP

TOOL
TL-ST002-T

This is a Brand New 9-Piece Torx End Hex key L-Wrench Set. Eye-catching colors and simple design. Special heat treated process and Japanese steel for prolonged tool life. Soon to be your favorite tool

Product Features:

- Material :** Heat treatment steel 6150 tool / Nylon body
- Torx Spec:** T10, T15, T20, T25, T27, T30, T40, T45, T50mm
- Weight :** 268g/set
- Color :** ED

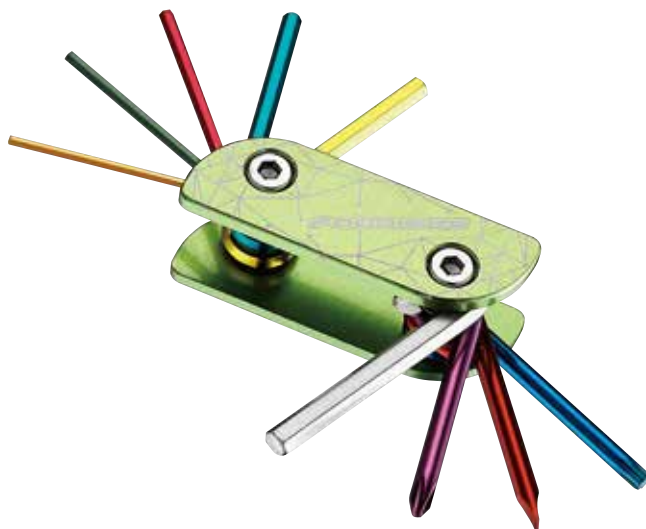

TOOL
TL-ST003-M

This is a Brand New 9-Piece tools Set. Eye-catching colors and simple design. Special heat treated process and Japanese steel for prolonged tool life. Soon to be your favorite tool

Product Features:

- Material :** Heat treatment steel 6150 tool / Nylon body
- Spec:** Allen wrench 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm, Torx T25, Slot, Phillips
- Weight :** 145g/set
- Color :** ED

BRAKE SYSTEM

BR-S006

Route your existing brake cable and housing from your current drop levers through these ergonomic lever. Allows you to control your speed from multiple hand positions. Can use independently. Split clamp for easy installation. Adjustable reach and return spring

Product Features:

Material : AL6061-T6 forged.
For : Ø31.8 handlebar
Weight : 128g/pair
Color : S.B Black, Silver

Canti or caliper compatibility.
 With Ø24mm shim

COMPUTER MOUNT

HA-S011

Triathlon bar computer mount for GARMIN Edge® & MIO®
 Conveniently keep track of your data.

Product Features:

Material : AL6061-T6 body, plastic adapter
Weight : 42.5g
Height : S.B. Anodized Black, Red, Gray body
 Black Plastic adapter

Compatible with GARMIN Edge® & MIO®

COMPUTER MOUNT

HA-S010

Computer mount for handlebar. Stable clamp for easy reading. Compatible with GARMIN Edge® & MIO® .

Product Features:

Material : AL6061-T6 body, plastic adapter
Weight : 40.5g
Color : S.B. Anodized Black, Red, Gray body
 Black plastic adapter

Compatible with GARMIN Edge® & MIO®
 For Ø31.8mm handle bar
 Arm length adjustable
 Comes with Ø25.4 x Ø22.2 shim

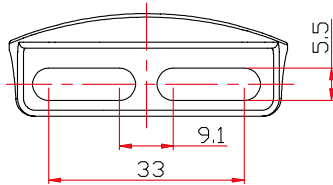

COMPUTER MOUNT HA-S014

Computer mount for stem. Compatible with GARMIN Edge® & MIO® & GoPro® camera. Record your best moments from a unique stem viewpoint.

Product Features:

Material : AL6061-T6
Weight : 40g
Color : S.B. Anodized Black, red, gray

For stem front cap (Screw center distance: 9 - 33mm)
 Compatible with GARMIN Edge® & MIO® & GoPro®
 Fits all Fouriers stems

COMPUTER MOUNT HA-S017

Handlebar computer mount for GARMIN Edge® & MIO®. Dedicated and stable adaptor for the best recordings.

Product Features:

Material : AL6061-T6 body, plastic adapter
Weight : 41g
Color : Sandblast black anodize

Compatible with GARMIN Edge® 1000 & MIO®
 For Ø31.8 handle bar
 Arm length adjustable

COMPUTER MOUNT HA-S018

Handlebar computer mount for GARMIN Edge® & MIO® & GoPro®. Dedicated and stable adaptor for the best recordings.

Product Features:

Material : AL6061-T6 body, plastic adapter
Weight : 41g
Color : Sandblast black anodize

Compatible with GARMIN Edge® 1000 & MIO® & GoPro®
 For Ø31.8 handle bar
 Arm length adjustable
